Dual-Lid Stainless Steel Canister Out with the Old, In with the New

First In First Out (FIFO) Fresh Canister is not your ordinary canister. Two airtight lids means stale food can't collect at the bottom - ever. When it's time to refill or top off the contents, food that is first filled in can be the food that is first eaten. Simply refill FIFO from one end and dispense food from the opposite end. Your older contents get used up first! FIFO canister allows dry food such as coffee, sugar and flour to stay flavorful, nutritious and safer for longer consumption. Simply put, FIFO canister doesn't just contain food, it sustains freshness.

FIFO features two clear, shatterproof airtight lids allowing efficient access to contents from either end. Durable commercial-grade, non-corrosive, 18/10 stainless steel construction offers superior protection from air, light, moisture, and odors that can quickly rob dry foods of freshness, nutrition and flavor. FIFO addresses the growing need for safer and more efficient ways to maximize food freshness. FIFO is available now in a two-quart size and measures 10" x 5" diameter. Additional sizes are available upon request.

Features

- Two-lid design offers first in first out consumption
- Clear and shatterproof airtight lids seal the freshness
- Lightweight stainless steel canister body offers durability
- Great for coffee, tea, rice, sugar, flour, cereal, and more
- Canister size: 10" tall x 5" diameter (other sizes available)
